## Internship Weekly Report - MBA Tech (TIP)

---

Student Name Ansh Maheshwari

Employer Name Anand Rathi IT

Reporting Period 08-05-2024 to 10-05-2024

### Provide a brief summary of the goals, activities, and outcomes for the week:

In my first week of the technical internship, I focused on revising Python basics. With guidance from my mentor, I reviewed key concepts like data types, functions, oops concepts. Through practice, I strengthened my skills and felt more confident in my programming abilities by the end of the week.

This week also allowed me to get to know my mentor and colleagues better, giving me insight into how we'll work together. Despite the short time, I feel prepared to take on upcoming tasks and contribute effectively to the team. Overall, it was a productive start to the internship, setting the stage for what's to come.

### Describe any new knowledge, skills, or experiences gained over the week:

During the week, while I didn't learn entirely new technical concepts, I solidified my understanding of Python fundamentals through revision. This helped enhance my coding proficiency and problem-solving skills.

After the completed report has been signed by both the Intern and Employer, please scan the form to a pdf format and email it to the Internship Coordinator (Mahesh Mali, mahesh.mali@nmims.edu) and Internship Mentor. Specific problems, concerns or suggestions from either the Employer or Intern should be emailed separately to the Internship Coordinator.
